New & Improved MetCap Mobile App

Our mobile banking solution provides one platform for business and consumer relationships that can be accessed anywhere, anytime, on any mobile device. It's fast, free and available to all of our digital banking users!

Some existing features include:

- Check balances, transfer funds, view transactions
- Schedule single, reoccurring, or future bill payments
- Deposit checks remotely
- Advanced user entitlements
- BAI output for reporting
- Multi-transfer transactions and multi-wire origination
- Batch recipient and wire uploads
- Upload NACHA formatted files

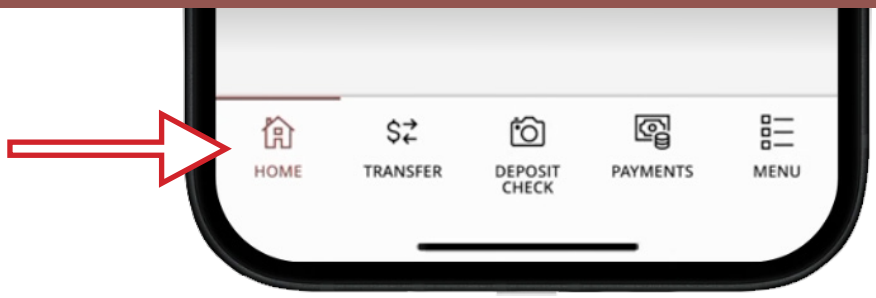

...and much more!

New feature highlights:

- Updated look and feel and improved user experience
- Positive Pay enhancements
- ACH multiple file upload and 1000 batch recipient capabilities
- Now available for Apple Watch

Download our mobile banking app for Android or iOS today.

New **Mobile Thumb Bar** feature for easier access to frequently used menu items

> Tap "Menu" on the bottom right to access the full list of menu options.

> Please note, you may see different quick access menu options on the Mobile Thumb Bar depending on account type and feautures enabled.

> No action is needed by existing mobile app users, but following the update on 9/25, you may be prompted to reset your biometrics (face ID, passcode, etc.).

Now available for Apple Watch

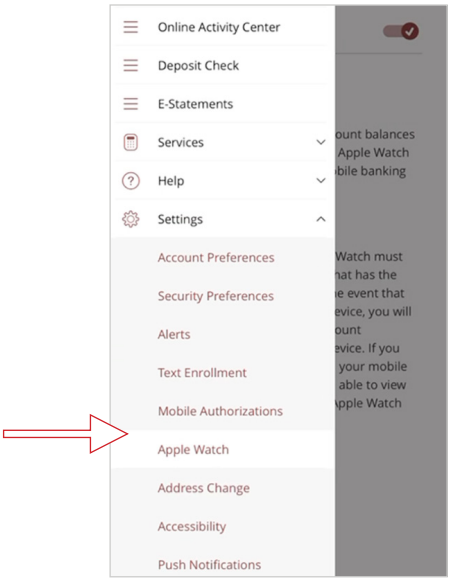

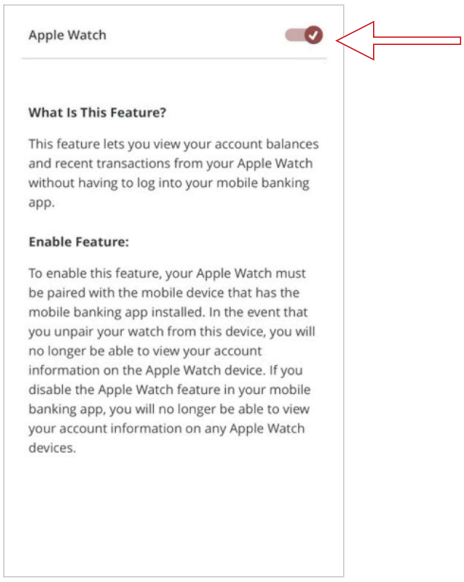

Capabilities:

- View 10 most recent transactions
- View first 10 account balances
- Includes cPFM accounts

Enable from the iOS app

- Before you can view balances on your Apple Watch, you must first enable the feature in your iOS app.
- Log into your iOS app, and access Apple Watch from the Main Menu, under Settings, to enable the feature.

View Account Balances

- Once enabled, you can view Account Balances via your Apple Watch. (The first 10 accounts that show on the Account Summary Page will display.)
- Swipe left and right on the Apple Watch to scroll through and view different Account Balances.

View Transactions

- You can also view the 10 most recent transactions for each account via your Apple Watch.
- To view transactions, tap on the Watch screen and swipe up and down to scroll through the transactions list. There is also a Back option to navigate back to the Account list.
